***Response to Amendment***

The following is in response to the amendment filed on September 21, 2005.

***Allowable Subject Matter***

Claims 1-6 and 8-10 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a method for the production of mineral wool based on a viscous mineral melt, wherein added to the melt are a spent aluminum silicate catalyst material having at least 35% by weight of aluminum oxide and a synthetic zeolite powder containing up to 5% by weight of rare earth oxides.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Applicant's arguments filed September 21, 2005 have been fully considered.

Applicant's arguments and amendments to the claims have overcome the rejection of claims over Hirayama (US 4,029,495) in view of Harter et al (US 2,467,889). The combination of a spent catalyst and a synthetic zeolite as claimed in a mineral melt is not taught or suggested by these references.

The filing of the English translation of the foreign priority document overcomes the rejection of claims under 35 U.S.C. 102(a) over Klose et al (WO 02/057194).

The rejection of claim 11 under 35 U.S.C. 112, second paragraph and 35 U.S.C. 101 set forth previously has been overcome by cancellation of claim 11.

***Priority***

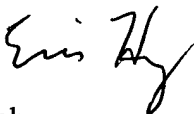

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
